

THE JOHN LAWRENCE SEMINARS

"MICRO/NANO-FABRICATED TOOLS FOR BIOSENSING"

PETER DENES, PH.D.
BERKELEY LAB

The BRAIN Initiative inspired new partnerships between physical, biological and computational scientists and engineers at Berkeley Lab. The intersection of these skills has considerable potential to develop novel sensors for a wide range of biological systems. In this presentation I will describe on-going work towards the BRAIN Initiative, and ways that the technologies developed could be applied in a variety of other relevant areas.

TUES., JAN. 19TH
4:00 P.M.

717 POTTER STREET
ROOM 141
BERKELEY LAB

HOST:
KRISTOFER BOUCHARD

Schedule of Seminars: <http://johnlawrenceseminars.lbl.gov>
Non-LBNL attendees: please RSVP to FGuagliardo@lbl.gov or 510-486-6490
